

## Bilingual Patent Analyst

We are looking for Patent Analysts in our London office to conduct technical research in support of Landon IP's customers to support legal and business related IP decisions. Fluency in German is a must.

Landon IP is a leading provider of professional, legal and business support services throughout the intellectual property (IP) lifecycle. The company's services include patent and trademark searches, analysis of new technologies, global information retrieval, patent translations, and advanced patent law training of attorneys. The growing company is headquartered in Alexandria, Virginia and has offices in Southfield, Michigan; El Dorado Hills, California; Tokyo, Japan; London, England; and Shanghai, China; employing over 200 people. More information about Landon IP can be found at [www.landon-ip.com](http://www.landon-ip.com).

### Job Description

- Use your technical expertise to perform searches relating to patentability (novelty), validity or invalidity, and freedom-to-operate.
- Conduct long-term studies as needed that support business decisions related to patent strategy, licensing, portfolio management and other needs.
- Communicate effectively with customers to understand their search needs, draft informative reports that detail and summarize search results.
- Maintain proficiency with commercial technical literature databases as well as manual library resources.

### Job Requirements

- University degree (advanced degree preferred) and experience in one of the following areas: **Electrical Engineering, Electrical Communications** (Telecommunication, Wireless Technologies, signal processing), **Computing** (Computer Science, Networking, Software Engineering, Physics, Mathematics), **Mechanical Engineering** (Complex Automotive, Incomplex Aerospace) or **Chemistry/Materials** (Polymers, Organometallic Chemistry).
- Previous patent examining or patent searching experience preferred, though not required as extensive training will be provided.
- In-depth knowledge of technical literature in the area of subject matter expertise
- Highly skilled developing a search methodology and in conducting searches
- Extreme attention to detail
- Strong time management skills and dependable in completing quality projects against tight deadlines
- Excellent interpersonal, oral and written communication skills
- Ability to search and report in both English and German in your technical area of expertise.

### How to Apply

Please submit your CV and cover letter detailing your relevant experience, areas of technical expertise and salary requirements to J.Stich - [wk@worldkonnekt.com](mailto:wk@worldkonnekt.com) . Please reference the position title in your email subject line.
