Do you demand the best from your professional career? Are you inspired by excellence? At SAP, you will have the power to make a real impact. As the global market leader for business software, SAP helps companies and organizations in more than 25 industries to run better.

PURPOSE AND OBJECTIVES

SAP is a leader in business applications with most of the world's biggest and best companies running our software. SAP products are used around the world to bill, to buy, to hire, to inform decisions and to execute on them.

The Development, Processes & Tools team is an internal software development team responsible for defining, designing and implementing the applications that support developers, product owners and the entire product development organization in their daily work. Within the board area Products & Innovation, we are responsible for creating and setting the benchmark on processes, tools, and culture of how entire SAP should develop products that customers want.

"In order to create products that deliver great experiences, product developers must have great experiences."

EXPECTATIONS AND TASKS

SAP understands that a business application must be easy to learn, easy to use, and must enable the user to do what they do best: their work. Your job will be to understand their work, find opportunities to make the information they need accessible and understandable, and produce a product experience which is exceptional.

As a Working Student or Intern in the Development, Processes & Tools team, you will be working in a fast-paced and agile environment where prototypes become products, and product increments are shipped in very short cycles. Our projects are varied, and you will be part of a co-located, cross-functional and dynamic team consisting of product owners, UIs and developers. Our focus is always on customer needs: understanding them and fulfilling them. We strive for innovative products using state-of-the-art technology, but first and foremost, they must be products that address real customer needs.

In this role, your tasks include:

- Analyse and understand user needs and translate into product requirements
- Design UIs that fulfil the needs
- Design cutting edge visual design concepts for development tools
- Create interactive prototypes for communicating the product vision
- Create artefacts such as wireframes, low-fi and high-fi mock-ups, design specs and code
- Take care of the right visual design for the product, design icons and graphics, in cooperation with your visual design colleagues
- If possible, implement the UIs (the HTML5/CSS part of it) in collaboration with the development team
- Discuss feasibility and desirability of design alternatives with architects and developers
- Support Usability Tests

EDUCATION AND QUALIFICATIONS / SKILLS AND COMPETENCIES

- Student (f/m) at a university or university of applied sciences
- Preferred fields of study: Human Interaction Design, Industrial Design, Graphic Design or related fields

Student for User Experience Design

- Solid experience in working with design tools, such as Photoshop, and Illustrator
- Up to date on the latest design trends, such as flat design, typography, icon design, and so on
- Background in web development; experience with HTML5, CSS3 are required. Javascript, Angular JS, Bootstrap are a plus
- Fluency in German and good English language skills
- Fast-learning, independent and goal-oriented working style

WORK EXPERIENCE

Your set of application documents should contain a cover letter, a resume in table form, current university transcript of records, copies of any academic degrees already earned, and if available, references from former employers (including internships). Please describe as well your experience and skills in foreign languages and computer programs/ programming languages.

!PLEASE APPLY ONLINE AT WWW.CAREERSATSAP.COM!

SAP'S DIVERSITY COMMITMENT

To harness the power of innovation, SAP invests in the development of its diverse employees. We aspire to leverage the qualities and appreciate the unique competencies that each person brings to the company.
