

A great team is looking forward to working with you in our Ulm location.

# THE FUTURE WILL NEVER SIMPLY WORK IN THEORY.

**SHARE YOUR PASSION FOR TOMORROW'S TECHNOLOGIES WITH US.**

World-leading technologies don't make it onto a BMW until they've undergone one of the most challenging journeys you can imagine. It takes dynamic teams with outstanding technical skills to drive them from the drawing board to the road. That's why our experts treat you as part of the team from day one, encourage you to bring your own ideas to the table – and give you the opportunity to really show what you can do.

## **Working Student Continuous Integration (m/f)**

We, the BMW Group, offer you an interesting student job in the field of software development and testing. In the course of your work you support our team to develop an automation framework for testing of camera based advanced driver assistance systems (ADAS). The framework is developed as a web application written in Java. Furthermore you are involved in the development process by automating tests which are being executed on the different layers and interfaces. The involvement in related technologies you will be working with like Java, Java EE, Tomcat, Vaadin, FitNesse, Selenium and JAX-RS completes your exciting area of responsibility.

### **You should have:**

- Studies in computer sciences, electronics or a comparable course of studies.
- First practical experience with Selenium desirable.
- Knowledge in object oriented programming, especially in Java.
- Knowledge in SQL desirable.
- Knowledge in MS Office.
- German and English business fluent.
- Teamwork and communication skills.
- Independent working style.
- Analytical thinking.
- Self-initiative.
